

**5. Access variances inside incorporated areas are approved by that city.**

2. Sections shall be noted adjacent to the section line unless the plan is entirely contained in one section. If the plan is entirely contained in one section the the section may be noted under the Township and Range at the top of the plan sheet.

***Ls - Length of spiral curve***

**Comments on the Sheet Key**

- 1. The sheet key should clearly show the arrangement of the sheets with minimal detail.**
- 2. A sheet key is only needed on larger projects.**

4. Projects with several intersecting local roads may tabulate the functional class, design vehicles, and posted/design speeds in a separate table.

**3. Begin and end project callouts should be separate from other callouts even if the stationing is coincident.**

**NOT TO SCALE**  
**NOT ALL REQUIRED CHANNELIZATION ELEMENTS SHOWN**  
*Reduced scale - use larger scale on actual plans.*  
*All elements are subject to be evaluated per standards.*
